

CABI BioProtection Portal

The largest free resource for biological plant protection!

The portal offers companies a searchable platform to showcase registered bioprotection products by country, crop, and pest. Available in 17 languages on web and mobile (with offline access), it boosts product visibility, regulatory compliance, and end-user engagement through educational content.

Problem

- Farmers often overuse chemicals, damaging ecosystems and creating resistant pests.
- Demand for safer, eco-friendly solutions is growing, but access to product data is scattered.
- Many bioprotection products remain underpromoted or misunderstood in target markets.
- Low visibility limits private investment and adoption in bioprotection innovation.

Solution

- Boosts visibility of registered bioprotection products across markets.
- Connects suppliers with farmers, advisors, and decision-makers.
- Offers a trusted platform for promoting science-backed, compliant solutions.
- Supports outreach in both online and offline environments.

Key points to design your business plan

The CABI BioProtection Portal is a free, multilingual tool that helps agribusinesses identify and promote locally registered biological crop protection products. Integration focuses on/

- Streamlining product sourcing, training technical teams to use the platform effectively, supporting offline access for field staff,
- Leveraging data to meet sustainability and reporting goals.
