

Learning Platform for Agricultural Advisory Services

Learn, Advise, Transform Agriculture!

CABI Academy strengthens national extension systems through self-paced, accredited training on plant health, pest control, and sustainable practices. It builds the skills of frontline advisors, helping governments improve farmer productivity, food security, and climate resilience.

This technology is **pre-validated**.

9.7

Scaling readiness: idea maturity 9/9; level of use 7/9

Problem

- Extension agents lack access to updated, practical training.
- Most training materials aren't suited for rural or low-data environments.
- Scaling consistent advisory services across regions is difficult.
- Complex technical content limits field-level application.

Solution

- Trains extension agents with practical, science-based knowledge.
- Works in rural, low-data environments—easy to scale nationwide.
- Strengthens national advisory services and policy delivery.
- Builds capacity using global research and education expertise.

Key points to design your project

Embed CABI Academy into national training programs to upskill extension agents with science-based, easy-to-access courses. to integrate in your project,

- Promote the Academy as a national training tool for extension officers.
- Include it in public staff development and certification programs.
- Support access in rural areas through digital centers or mobile devices.
- Align it with national agricultural education and advisory strategies.
