

NoduMax Inoculant for Soybeans

Advanced Soybean Inoculation Solution for Sustainable Agriculture

This technology is a solid inoculant, which contains the industry-standard strain USDA 110 and includes a gum Arabic adhesive and user instructions. It is packed in 100 g packets sufficient for 10 to 15 kg soybean seed.

✓ This technology is **TAAT1 validated**.
7-7
Scaling readiness: idea maturity 7/9; level of use 7/9

Gender assessment 👍 4

Climate impact 👍 7

- ### Problem
- Poor Root Nodulation and Low Biological Nitrogen Fixation (BNF) in Soybeans
 - Lack of Quality Inoculant in the Market
 - Limited Access to Affordable Inoculants in African Countries
 - Complex Application Procedures
 - Lack of Protein Sufficiency and Soil Fertility in Soybean Production
 - Clumping in Alternative Inoculation Methods

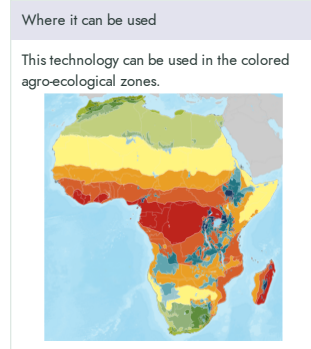

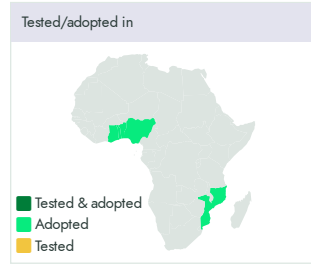

- ### Solution
- Promotes biological nitrogen fixation, reducing the need for expensive nitrogen fertilizers.
 - Ensures the presence of symbiotic rhizobium bacteria, optimizing root nodulation for improved nutrient absorption.
 - Enhances BNF, thereby boosting soil fertility and reducing reliance on synthetic fertilizers.
 - Promotes natural nutrient cycling in the soil, contributing to sustainable agricultural practices.
